

PEST CONTROL SERVICES

Our experienced pest management team knows that your problem is unique.

Controlling pests is a science and one solution doesn't fit all situations.

We work in close consultation with you to agree an approach that ensures maximum impact on the pests, but minimum impact on your organisation.

Cannon Pest Control offers a wide range of competitive pest control services to meet even the most demanding commercial, retail and industrial operations in both the private and public sectors.

Rodents

Our comprehensive control programme includes a wide range of humane preventative measures to provide protection from the risks of contamination, spread of disease and material damage these pests cause.

Insects

Insects transmit a host of dangerous diseases through surface and food contamination. We supply products and a comprehensive range of services to effectively control insects, even in the most difficult and awkward situations.

Birds

Proactive bird control saves money and helps to maintain business profits and good Health and Safety practice. We offer a range of progressive business-friendly solutions to combat pigeons and other nuisance birds that can spread a range of diseases and can be a source of secondary infestation by pests such as lice, mites and flies.

To find out more about our Pest Control service, or any other Cannon Hygiene services, please call 0800 494 436 (freephone), email enquiries@cannonhygiene.co.nz or visit www.cannonhygiene.co.nz.
