

TECHNOLOGY HYGIENE

cannon

hygiene solutions for washroom - technology - linen

There are around  
**25,000 germs**  
on an office  
telephone and just  
49 on a toilet seat\*. Can  
you afford not to have **Technology Clean?**

Do you know that there are thousands more harmful germs on a telephone, keyboard or mouse than on a toilet seat? No wonder 60% of all illness is contracted within the workplace! Look after your staff and reduce absenteeism with Technology Clean, sanitising and cleaning.

We will remove dust that builds up in vent areas and grooves of telephones, printers, fax machines and computers using brushes. We will then stringently cleanse and remove all grime and dirt from the casing areas, keys and other components. And finally, we will apply pre soaked sanitised anti-static wipes to the telephone or computer including around and between each individual key.

We operate quietly and efficiently within normal working hours.
